```dart
import 'package: flutter/material.dart';
import 'package:shared_preferences/shared_preferences.dart';
class LogoutPage extends StatelessWidget {
  @override
  Widget build(Build Context context) {
    return
Scaffold(appBar: AppBar
(title: Text('صفحة تسجيل الخروج ' ),
  body: Center( child: Elevated
 Button(onPressed: () {

    class LogoutPage extends StatelessWidget {
  Future<void> _logout() async {
    Shared Preferences prefs = await SharedPreferences.getInstance();
    await prefs.setBool('isLoggedIn', false);  false
    Navigator.of(context).pushReplacementNamed('/login page')}
@override
  Widget build(BuildContext context) {
    return
Scaffold( appBar: AppBar(title: Text('صفحة تسجيل الخروج')),
    body: Center(
      child: ElevatedButton(
       onPressed: _logout,
        child: Text('تسجيل الخروج'),
      ),
    ),
  );
  }
        }

      },
      child: Text('تسجيل الخروج'),
```
